# Application – [Name of company] (date)

Hi,
I'm applying for the position of *[name of position]*, as your work with *[insert briefly – e.g. digital solutions, e-commerce, communication or user experience]* aligns very well with my own focus on creating user-friendly and accessible digital solutions.

I'm currently studying a Top-up Bachelor's degree in Digital Concept Development at Zealand and have a background as a Multimedia Designer from KEA.

**About me**
As a person, I work in a structured and focused way and thrive in tasks that require overview, attention to detail and high quality in digital work.

**Skills**
My main professional strengths lie within:
- o UX and digital design
- o Frontend and web development
- o Accessibility and usability

I have experience with HTML, CSS and JavaScript as well as Astro and Tailwind, work daily in Figma, and have experience with SEO, Lighthouse and WAVE.
In addition to that, I have experience with databases (Supabase and REST APIs) and project management using SCRUM, Trello, and the Double Diamond model.

_____

**3 quick work facts**
- o I'm goal-oriented and always make sure a project is followed all the way through, regardless of its complexity
- o I'm reliable and flexible when it comes to working hours and scheduling (even when public transport gets in the way)
- o I work in a highly structured way and usually maintain a clear overview— even when a project changes direction

_____

I have particularly noticed your focus on *[insert something specific about the company]*, and I would be highly motivated to contribute to similar solutions as part of your team.

I hope you may find my profile relevant.
I look forward to hearing from you!
